Epic

“I am rewarded with a sound from my system that feels open and effortless. In particular, vocals seem to have more detail and all the nuances of expression (including the odd intake of breath) are very evident. Bass is really well controlled and tight, while timing is excellent. To sum up these cables in one word, they are ‘musical’ ”

ChordMusic

Prices from (UK RRP)

	ChordMusic Analogue RCA (various 1.2m tonearm options also available)	The ChordMusic range represents the very best we can offer. At its heart lies our revolutionary Taylor® insulation material. Before the advent of this material, our best insulation was dry nitrogen foamed PTFE. This has been the “go to” insulation material at Chord Company for many years and is still used in a lot of our cables. It does however have one major weakness in that it is not phase stable at room temperatures. Unfortunately this is an area where human hearing is extremely sensitive. Taylor® eliminates this problem. The musical improvement is spectacular in virtually every aspect of the performance.	1m: £4000.00 Extra m: £1800.00
	ChordMusic Analogue 2RCA-DIN/DIN-DIN/DIN-XLR (for Naim NAP250/300/500)	So significant was this improvement that we felt it deserved a new design and flagship range. The results were spectacular and culminated in the 2015 launch of the ChordMusic range. Every cable is hand-built at Chord Company by our most experienced technicians. The build times are long and extreme care is taken over every aspect of assembly. The finished cables are then individually listened to before being packed and despatched.	1m: £3500.00 Extra m: £1400.00
	ChordMusic Analogue XLR pair	These cables are not cheap and represent a significant investment, finding their way into only the most advanced audio systems.	1m: £5500.00 Extra m: £2500.00
	ChordMusic Digital RCA / BNC / XLR (AES/ EBU)/USB	Why do we produce cables at this level? The answer is quite simple - it is only during the development process of the very high-end cables that we learn the most about cable design. Taylor® has exposed areas of performance previously masked by phase issues. This increased resolution allows us to produce better cables that can be enjoyed at more affordable budget levels. A bit like Formula 1 racing - few people buy these cars but a lot of the advanced technology trickles down into the cars that we all use.	1m: £3500.00 Extra m: £1400.00 1m AESEBU: £4000.00 Extra m: £1800.00
	ChordMusic Streaming	If your system merits cables at this level or even if you are just interested in hearing how good a system can sound, then we urge you to audition the relevant models at your retailer or in your home system.	1m: £4000.00 Extra m: £1800.00
