Pricing & specifications

C-view HDMI 2.1 48GBps

Chord Company C-view HDMI cable is a cost-effective, high-performance display connection featuring heavily-shielded copper conductors and is available in lengths of 0.75m, 1m, 1.5m, 2m and 3m. C-view HDMI benefits from a 48GBps bandwidth with a resolution of 8k at 60hz or 4k at 120hz. It supports Dynamic HDR, HDCP2.3, eARC, 3D and all HDMI audio formats.

Clearway HDMI 2.1 48GBps

Chord Company Clearway HDMI cable takes materials and shielding to the next level, with zinc-shielded plugs, increased bandwidth and thicker high-quality copper conductors coated with a skin/foamed polyethylene insulation. Five pairs of conductors are individually internally shielded, with the overall bundle further protected by a twin aluminium foil outer screen. Clearway HDMI supports 8K at 60Hz, 4K at 120Hz, 48GBps, Dynamic HDR, HDCP2.3, eARC, 3D and all HDMI audio formats. Available lengths: 0.75m, 1.5m, 2m, 3m. A worthy addition to the award-winning Clearway range.

Shawline HDMI AOC 2.1 48GBps

Shawline HDMI AOC uses a high-quality true HDMI 2.1 chipset at both ends of the cable and the highest OM3 grade (over 10 Gigabit bandwidth) glass fibres rather than the typical OM2 (up to 1 Gigabit bandwidth). Alongside the full 8K HDR picture quality, this ultra high-speed cable benefits from improved audio performance and is highly shielded against HF noise. Shawline HDMI AOC is available in 1m, 2m, 3m, 5m, 8m, 10m, 15m & 20m standard lengths. Custom lengths of up to 150m are available by special order.

Epic HDMI AOC 2.1 48GBps

Epic HDMI AOC is our highest-performance cable. An optical/copper hybrid with HF noise protection. The copper elements have been upgraded for improved mechanical isolation, but the most noticeable difference is the advanced HDMI 2.1 chipset. Epic HDMI AOC is capable of full 8K performance (120Hz) and while 8K content is still limited, it will become more widely available, making this the perfect choice for any installation which doesn't allow swapping-out cables at a later stage. Epic HDMI AOC guarantees the best results from current 4K sources but with added peace of mind for the next major video upgrade/s down the line. Alongside the upgraded mechanics, picture quality and high frame rate, the optical cables provide better audio performance and are immune to HF noise. HDMI 2.1 can process image quality up to 10K at 100Hz; something that should be of great interest to demanding gamers and virtual reality applications. Epic HDMI AOC is available in 1m, 2m, 3m, 5m, 8m, 10m, 15m & 20m standard lengths. Custom lengths of up to 100m are available by special order.
